

We would like express our support for Satellite Radio. We currently own 3 units and paying for our subscription to this great service. We don't understand how someone should dictate what radio service we choose to receive. Especially when we are paying for it. Actually we would like to see local news station to be added to the service in the future. The local traffic and weather service is great. We very much enjoy this service while traveling. As current paying subscriber we demand, that the satellite radio service should not be limited or dictated by some big broadcasting corporations, who feel threatened about their ratings. Instead; step up to the standards and public demand. Only group, who should be dictating satellite radio's programming and services are the subscribers. That's our service! Don't our service. WE ARE PAYING FOR IT! Best regards.
